Binance - v2023.02

This folder contains code to download historical cryptocurrency data from Binance Market Data up to February 2023.

Installation

Install the dependencies with renv:

```
renv::restore()
```

Usage

Generate the following data files by running the corresponding R script.

File `bmd_mth.csv.gz`

```
Rscript bmd_mth.R
```

Contains monthly data derived from open, high, low, and close prices at daily, hourly, and minute frequency.

Field	Type	Description
`SYMBOL`	CHARACTER	Trading pair
`YYYYMM`	INTEGER	Year-month in the format `YYYYMM`
`FREQ`	CHARACTER	Frequency of open, high, low, and close prices (`1d`, `1h`, `1m`)
